For Immediate Release

Sixty Six Oil Field Services Unveils Ambitious New Business Plan to Propel Growth and Innovation developing New Emerging Growth Companies.

Oviedo, FL – *SIXTY-SIX OILFIELD SERVICES, INC.* (OTC: SSOF) Daniel Sobolewski, CEO of *SIXTY-SIX OILFIELD SERVICES, INC.*, said today, We are thrilled to announce the launch of our dynamic new business plan aimed at driving exponential growth and fostering innovation in multiple sectors. This strategic roadmap represents a significant milestone for our new company as it has positioned itself dedicated to providing unparalleled value to its customers and stakeholders.

Sixty Six Oil Field Services under previous management failed its shareholders and investors. Failing only means you've discovered one less way not to travel. Quitting ends the journey for all and we are not quitters. The new Board of Directors and the incoming management team plan to earn a reputation for excellence, efficiency, and diversity. The new business plan is a testament to the company's commitment to delivering cutting-edge solutions while staying true to its core values. Expansion and Diversification: The new business plan marks an era of expansion for Sixty-Six Oil Field Services. The company aims to expand its operations into multiple verticals to include Clean Water, Distilled Spirits, Technology and Entertainment.

The comprehensive plan outlines several key areas of focus that will shape the company's future:

- Clean Water: on July 6, 2023, CNN (NASDAQ WBD) posted a story stating, "Almost half of the tap water in the US is contaminated with chemicals known as " forever chemicals," according to [a new study from](#) the US Geological Survey. With the rise in fuel cost, the move towards green energy, transportation cost will push good clean drinking water to new price highs. Aging Infrastructure in developed countries are aging and as the population grows, the demand for water increases and the cost will continue to rise. Surely, after the CNN article compliance with environmental regulations and water quality standards will require substantially investments in water treatment technologies, which will add to the overall cost of water. At SSOF we asked is there an alternative solution? We believe there is to Brand Good Clean Drinking Water not only nationally but Internationally.

- **Technology-Driven Solutions:** We live in the digital age, everything is captured and displayed online and Big Box Retailers with bricks and mortar are falling to the wayside with likes of point click, buy and deliver direct to your door step by Amazon (NASDAQ AMZN). Our technology play will be the first of kinds kind in the Affiliate Marketing Space allowing consumers to share in the profits on goods purchased.
- **Distilled Spirits:** One would think it is a far stretch to enter the Distilled Spirits Industry. There are over 120,000 brands in the United States and growing. Competition is fierce and under the Three Tiered System of distillers, wholesaler and retailers. But, there is a rapidly growing direct to consumer application that is coming of age and we plan to take advantage and put our foot into the arena.
- **Entertainment:** How we entertain ourselves is changing. The rapid rise of informational display online is a natural conduit to market products while giving consumers a peek into how their goods are made, the people who make it and what actually goes into the product. Educational, Informative and Researching are all forms of entertainment and one day we look to stream.

Speaking about the new business plan, Daniel Sobolewski , CEO of Sixty-Six Oil Field Services, said, "Our new strategic roadmap reflects our determination to lead the company into sectors that are more sustainable and meet our technologically advanced future. We are excited to embark on this journey, fueled by innovation, and dedicated to creating value for our customers, employees, and stakeholders alike."

The implementation of the new business plan is already underway, and Sixty-Six Oil Field Services expects to witness significant growth and positive results in the coming years.
